DESCRIPTION

This project provides for Advanced Transportation Management Systems (ATMS) in the County. The ATMS deploys the infrastructure elements to conduct real-time management and operations of the County's transportation system. Twenty-two National Intelligent Transportation Architecture market packages have been identified for deployment of the ATMS. Each of these market packages is considered a subsystem of the ATMS program and may include several elements. These subsystems are identified in the ATMS strategic Deployment Plan dated February 2001 and revised September 2005. One aspect of this project will focus on improving pedestrian walkability by creating a safer walking environment, utilizing selected technologies and ensuring ADA compliance.

Service Area

ATMS field deployment focus is Countywide, but components such as traffic surveillance cameras are limited to areas where there is fiber optic cable.

JUSTIFICATION

ATMS provides real-time monitoring, control, and traveler information in an effort to reduce traffic congestion and travel time, improve safety, and defer the need to construct new roads. ATMS emphasizes safety and efficiency of mobility to include mode, route, and travel time choices. ATMS supports public safety and directly impacts the movement of people and goods throughout the County's transportation system.

Plans and Studies

Pedestrian safety is considered during design.

Cost Change

Cost increase due to the addition of FY11 and FY12 to this ongoing project and addition of the comprehensive replacement of Ride On's Computer Aided Dispatch/Automatic Vehicle Locator system and on-bus hardware (including radios).

STATUS

Ongoing. *Expenditures for this project will continue indefinitely.

OTHER

This project now includes the replacement of Ride On's Computer Aided Dispatch (CAD) / Automatic Vehicle Locator (AVL) system and on-bus hardware (including radios). The replacement is based on a comprehensive evaluation completed in May 2005 and will provide improved safety and security, more reliable service, better informed scheduling, and a platform for real-time customer information. \$7,540,000 is included in FY07-09 for this replacement.
